Finally the Solution for Your Tennis Courts!

Is your tennis court looking old and worn down and you don't have the money to rebuild? Court Makers Inc. has found the solution for your old tennis courts. It can be problematic to rebuild an old tennis court because of established buildings and landscaping, but **Gorilla Court** is a synthetic turf technology that does not require large equipment to install. In the past many apartment complexes have resurfaced to "fix" the court, but the problem is that cracks come back and within a couple of years the court looks old again. **The Solution is Gorilla Court.** Without using any large equipment (no damage to your landscaping) Court Makers Inc. can rebuild your court to look better than it was originally. Additionally we offer a 5-year unconditional warranty.

This court will be **maintenance free** except for having your landscapers blow the leaves off occasionally.

Court Makers Inc. is excited about this new product because we finally have a solution for the apartment industry. Since this is a new product for Court Makers Inc. we will be offering special pricing for the communities that sign up for Spring 2009. Standard pricing for a court installation is \$27,000. However, for our Apartment Association customers that sign up for Spring 2009, Court Makers Inc. will:

1. Install Gorilla Court to specifications (per discussion with Court Makers Inc)
2. Install new Sampson net post.
3. Install new Gorilla tennis net
4. Install new tide court and score post
5. Install (1) courtside deluxe bench
6. Provide a 5 year unconditional warranty (upon completion)

All for a discount price of \$24,500 per tennis court - \$2,500 in savings!

Ask about our payment options!

Please contact Eileen Johnson or Marshall Dye to have the finest tennis court in your community!
